

Missions of Jesus The Christ and Link with Other High Beings

Dr. Dinshah K. Mehta
Servant of Servants of God

The Same Eternal Truth

Today is the Christmas Day of the year 1975. Year after year, the anniversary of this day is celebrated all the world over, not only by the Christians but also by others. This is because that which is Truth or emanation from The Truth is eternal.

Only, at times, in the history of eternity of Truth, there have been periods when The Truth that descends from The Source - called by Jesus the Christ His Father in Heaven, and given other names by other High Beings who descend from that Source - is reduced by the finite human minds of the followers to the level of human rationality. Then, it gets sidetracked.

Although The Truth prevails ultimately, the manifestations of sidetracking often confuse the ascending human minds. In that confusion, the descent from The Truth that is sidetracked is put in the background, until The Truth again prevails through a right High Being.

Thus, the same Truth manifests from eternity to eternity, suiting the times and the climes of manifestation.

One Decent of The Truth

One such Truth descended in the body of the son of man called Jesus. There have been differences of opinion amongst men about the exact date and time of birth. However, since centuries, men in general have accepted that the date of that Descent of The Truth that is Christ in the body of the son of man that was Jesus was on the 25th of December, linked with those times and the calendar of those times when Jesus was born. And, the time, as accepted by human beings, is the midnight between the night of the 24th December and the dawn of the 25th December.

Although it is important to know the exact time and the day of the birth, it is not material from the point of view of humanity that followed that time and day which is the 25th of December, and the midnight between the 24th and the 25th of December.

Sanctity behind The Accepted Time and Date of Birth of Jesus the Christ

Why? Because sanctification of any thought or object is done by the Divine Minds. The Divine Minds can be the descending Divine Minds of High Beings like the Mind of Christ incarnating in the body of Jesus. Or, the Divine Minds that follow the teachings of such High Beings and have grown to the state of being liberated, to begin with, from the matter-bound state unto The Source of spirituality.

These thoughts of the time and date may differ from the actual time and date of the birth of Jesus the Christ. Yet, 25th of December has been accepted by human beings in general since centuries. Among the human beings, there have been High Beings who have ascended unto spiritual realms. Their impress is in the invisible records in the sky, the *akashik* records, and has the sanctity behind the time and the date as of every other incident or thought other than the time and the dates.

Therefore, the sanctity of the time and the date of the birth of Jesus on this earth should be accepted once and for all without and doubt.

Immaculate Conceptions: Scientific Basis

As the story goes, before the birth of Jesus, there were prophecies and indications linked with the prophecies that a High Soul was about to incarnate in the matter that is son of a mother and that, too, without union with a material father. Even this is not easily accepted by many men who back their reasoning by whatever is known to men as the science of biology.

Nevertheless, it is a rare manifestation of The Truth that descended unto the matter gestating in the material mother known as Mother Mary. It will take many many discoveries to accept this basis, termed the Immaculate Conception.

It is possible even from the scientific point of view to give some idea about such immaculate Conceptions.

According to the up-to-date discoveries in what is termed the science of microbiology, the life process is due to the right permutations and combinations of aspects of the five elementals of nature - not of all that is contained in the five elementals, but of aspects of the five elementals.

If all the five elementals, and not their aspects, were to be the basis of the permutations and combinations, then that which becomes life, starting with the ultra-microscopic DNA and RNA becoming microscopic and macroscopic, whether in plant life or animal life or

the life that is man, would not be adversely influenced by any substance, leading to diseases and death.

However, since some aspects from the five elementals in the right proportions and combinations link up to produce the life principles which differ in different species of plants and animals including man ultimately, those aspects which do not become part of this basis that becomes life, can work against the life principle. If one does not know how to manage the adverse conditions that arise out of the opposition to the life principle, the conflict between the life principle and the other aspects of the matter produces diseases of various types, which can lead even to death.

This being the foundation in the ultra-microscopic life principle that becomes microscopic, which can be any cell, it has got potentials based on the foundation.

One such cell is the mother cell called ovum. It is a known fact that the ova in different mothers differ widely, not only according to the life principle that descends to become the ovum, but also the inheritances from parents and fore parents in the form of what are termed the genes of the chromosomes of the ovum.

In case of High Beings, the ovum has, in its very basic foundation, predominance of the finest matter, which is termed ether or sky. And, that which is ether or sky or space is so much linked with the Spaceless Spaciousness emanating from The Source that is God that through such finest of the fine matter, God becomes a part of that cell.

Other aspects of the matter are relatively grosser, as, for instance, that which is helpful for life, called the heat principle, in general. It is a part of the sun and though it is very fine matter, it is grosser than ether or space or sky. The space becomes the sun in the process of involution of the Spaceless Spaciousness, which is spiritual, becoming the origin of galaxies through the quasars.

Grosser matter out of these two, finer and the finest - sky and heat - is that elemental which is called the air. Air is not merely gases. It is gases of the nature, which sustain and foster the life principle. It is certain proportions and combinations of gases called the oxygen, the nitrogen, the carbondioxide, but not many other gases. This elemental of air is also relatively finer than the remaining two grosser ones. Yet, it is grosser than the heat principle and the sky or ether principle.

Water is the fourth principle, which is part and parcel of every living cell. Without water, it is not possible for a cell to live. It would become dehydrated. It is the vehicle for all the finer and the grossest matter in a cell, termed earth earthy matter.

In those cells, which have become vehicles for the Divine spiritual force to descend unto, the finest of the fine matter, that is, ether or sky or space, is predominant. With that, is oneness with the spiritual Source that becomes matter. And, in rarest of the rare cases, the very Source of all spiritually that is God, called by Jesus the Father in Heaven, can become a part of that cell.

This is how it is possible to get some idea of the ovum out of such finest of the fine permutations and combinations of matter becoming impregnated with the spiritual Source. Thereby, Immaculate Conceptions can happen. This is just to give an idea of the possibility of that which is considered impossible from the point of view of the ascending science of biology and microbiology.

So, in the birth of Jesus, the Soul of Christ, a part and parcel of The Source that is God, or the Father in Heaven, descended unto the ovum gestating in Mother Mary's womb.

Whenever such events happen where the very spiritual force - not inheritance whether from parents or fore parents or from the biological source - becomes the process of birth, it has invariably been found that anti-Divine mind tries to oppose in one way or another. It even tries to destroy it as happened in the case of Jesus and His birth, as also happened in the case of Krishna and His birth.

Prophecy before Birth

Another aspect of such events is that either through the mother or through nature or through both, prophecy descends from the spiritual Source making human minds aware that a High Being is going to be born. Thereby, the anti-Divine minds amongst men plan to destroy the vehicle that is the matter, the son of man, in diverse ways. It happened in the case of Jesus the Christ. It happened in the case of Krishna, the son of Vasudev, becoming the vehicle of Krishna the Lord. It also happened in the case of Spitaman Zarathustra, the Prophet of Iran.

Such conditions will go on arising from time to time. They are required to balance the imbalance caused by the human beings in the way of life of humanity and, through humanity, unto the way of life of other creations around. Whenever such conditions arise, there is the Descent of the Mind Divine through the son of man.

It is known in the history of such Beings that even though there may have been plans to destroy the vehicle of the Divine Mind, they pass through such plans successfully until it is a part of the Plan Divine that, after fulfilling the Will Divine for which they descend, they should become victims of the anti-Divine plans. That, too, becomes a part of their missions. And, because of that part of their missions, their missions live even though the vehicle dies.

This is what happened in the lifetime of the present-day generation to that one High Soul who became the victim of such planning by the anti-Divine minds. That was no other than the one who gave to this holy land of India *Swaraj*, the Father of the Nation, Mahatma Gandhi.

Mission of Jesus the Christ

Now comes the question: What was the Mission for which Jesus, with the Christ Principle incarnated in Jesus, took birth? There were three main aspects of the Mission, subdivided into five aspects.

Five Sub-Aspects of the Mission

The aspect known to humanity was to raise humanity unto Divinity.

The second aspect of the same Mission of raising humanity unto Divinity is linked with the souls of humanity, incarnated as well as discarnated.

The third aspect or the third part of the Mission is to raise the fallen souls, the souls that have fallen into the lowest spirit plane called hell or *narak*.

The fourth part of the Mission is to liberate the fallen souls, hell-bound or matter-bound, unto spiritual realms.

And, the fifth aspect, which is the highest, is to help the souls liberated from matter-bound states unto oneness with The Source that is God or His Father in Heaven.

All these aspects are not given in any Scriptures linked with the teachings of Jesus the Christ. Some of them may be accepted as a part of what is termed Apocrypha.

Yet, this is basic Truth, not only linked with the Mission given to Jesus the Christ but also linked with the Missions given to other High Beings like Krishna, Zarathustra, Buddha, Elish and Mohammed. It is founded on the principle that which is termed the Omnipresent must be All-Pervading.

It must pervade from the very Source of sources that is God, called by any name, the Absolute Truth, Divine Love or any other. It must pervade right unto all creations, including anti-Divine. Otherwise, that which is termed in general by human beings as God is not that God that is the All-Pervading Principle.

Three Spheres of Creations

It is known in all Scriptures that there are three main aspects of creations.

One is the spiritual that is without any matter but has all the potentials of matter as well as other than matter.

Second is all the creations that are matter, not only on this earth but in the whole cosmos, known and not known and yet to be known - the galaxies.

And, the third aspect of the creation is other than spiritual or material. It is termed the spirit creations - linked with hell, linked with matter and linked with in between hell and matter. They are spirit creations of diverse nature.

These are, in a general way termed in Scriptures, the three worlds or the three spheres of creations.

Linked with matter, there are the spirit creations ascending from hell to be purified to become worthy to grow unto liberation; the matter-bound spirits or earth-bound spirits which are stagnating in the rounds of births, life and death on this earth; and the third aspect of the spirits that are growing towards liberation but yet not liberated from the matter-bound state.

And, beyond, in the spiritual plane, there are liberated souls as well as Descending Souls of diverse nature.

In case of Jesus the Christ, He had to fulfill in His life-time on this earth Missions in all these three spheres of creations. The soul that is Christ was leading the vehicle that was Jesus the son of man after His fight with himself during the known part of His life of twelve years as well as the unknown part of His life of seventeen years.

Fulfillment of His Missions

When the Christ Spirit was leading the son of man that was Jesus, He gave, during His three years of Mission, that which was more linked with matter that is man on this earth in the incarnate form as well as linked with discarnate souls of men. He showed how they could grow unto liberation in the discarnate state, and gave the concept, the idea, to humanity how, after liberation; they can grow unto His Father in Heaven from the lowest state of liberation unto higher and higher.

In that connection, one metaphorical significant teaching of His is His saying: "In My Father's Kingdom there are many mansions". That Kingdom is the spiritual Kingdom, not material kingdom.

The souls liberated from the matter-bound state, when they grow unto the spiritual, have yet to be purified to become worthy to grow unto that Heaven where there are High Beings ascending and descending. It is The Heaven as distinct from "many mansions" in the Father's Kingdom. From The Heaven, they have to grow beyond, unto oneness with the Father in Heaven.

These are three aspects of the spiritual part of His Mission after liberation.

In the matter-bound states of the Soul, He fulfilled whatever had been said by the earlier Jewish Prophets - Moses, Eliah and others - for humanity to grow unto Divinity. And, that is how, whenever He found that human beings, in the name of religion given by the

Prophets of Israel, were misusing through wrong interpretations or otherwise their teachings, He spoke in unmistakable terms, even the hard way.

One such example is the whipping of the moneychangers in the Temple. Likewise, teaching individually or in groups what is right and wrong according to the teachings of the previous Prophets.

So also when those who claimed to be moral if not pious beings, brought to His presence those who were found in the immoral way of life, as one woman found in adultery, instead of reprimanding the woman concerned, He taught the lesson to those who brought her.

It was also a test they wanted to impose upon Him saying: "Rabbi! This woman was found in adultery. The Scriptures say, stone her unto death. What wouldst thou say"? And, without saying a word, He wrote on the sands where He was sitting: He that is sinless amongst you, shall cast the first stone at her. It made all search their hearts, and each one found that he himself was sinful. And they disappeared.

And, when the woman was left alone, He told her; I also forgive thee. Go, but sin no more. This is how He taught the way of life for human beings to become worthy to grow unto higher spiritual values.

Also, He did not neglect the material way of life, even beginning with feeding the masses. One such glaring example of the feeding of the masses was when He manifested the miracle of loaves and fishes. Though a miracle from human point of view, it is in keeping with the Law that nothing is impossible for the Divine Mind to think, say and do.

Likewise, He healed the sufferers from incurable diseases, incurable mentally and physically. Not all, but only those whom He found worthy to be cured, so that they could grow unto spiritual values in life. And, that is why it is said that He claimed that He cured only those whom His Father in Heaven wanted Him to cure.

Likewise, He advised those who came to Him for spiritual rewards through Blessings, through Grace, that they should become worthy to receive His Blessings and Grace. Otherwise, it would harm them. And, one such instance was when a rich man came to Him to ask for His Blessings to grow unto spiritual life. He told him to follow the Commandments given by the previous Prophets and accepted and added to by Him - The Ten Commandments.

And, when that rich man insisted that he had been following the Commandments but yet had not been growing, he was told: Go and sell your riches and give them to the poor. That showed His pull for doing what is right for the poor. Not that He gave value to the poor as the first value, but He knew what poverty was.

He had taken up the Mission of Divinity through incarnation in the surroundings of poverty in a manger. He wanted that each one must grow towards spiritual values in life by getting their birthright by way of their livelihood. In the present-day way of life, we term it

The Five Needs of Life. They are: the Right Nutrition; the Right Clothing; the Right Housing that are homes; the Right Health; and the Right Education.

And, in all these fields, one way or the other He taught what is right from spiritual point of view by example as well by words.

But, He did not give that value to the material side as He gave to the spiritual side of man, that is, the soul. And that is why one of the examples of His teachings is: None can grow unto My Father in Heaven except through Me.

And even to those who were matter-bound minds and who were in one way or the other ruling the lives of other human beings, He said: Meek shall inherit the earth. Meek does not mean weak; meek means humble; humblest of the humble shall rule the earth - not necessarily the poor and the weak but the humble ones. Not humble in the outward form, but from the innermost soul, humility growing in the outward manifestation. So many human beings show humility without basically being so, and they have no place in the Kingdom of God.

These were the two main Missions for earthbound souls: to grow unto liberation and the liberated souls to grow unto His Father in The Heaven.

His Last Mission

But the last of His Missions was the greatest of great and will take eons to fulfill. And that is to salvage the souls from hell.

After His Crucifixion and before His Resurrection, He descended for His hardest Mission. On that we had given the Discourse on the Christmas Eve. That Discourse will give an idea what a hard Mission it is for such a High Being who has descended from The Source of sources. This is all that is possible to say to give some idea about that Highest of the High Being of His time.

Link with Other High Beings

But there have been Highest of the High Beings of other times. And one of such was the Buddha.

Buddha was before that Principle incarnated in Siddharth; Buddha was when that Principle incarnated in Siddharth; Buddha has been after that Principle discarnated from Siddharth; and Buddha will always be for eternity.

And there are aspects of the Buddha, like aspects of the Christ, linked with matter; aspects of Buddha and Christ linked with hell; and aspects of Buddha and Christ linked with the spiritual realms. It is the same Source from which such Beings descend. Names

can be different in different times, different climates and in different religions but The Source is the same.

The differences in manifestation will be in keeping with the times in which they descend to fulfill the Will Divine on this earth. And, they manifest that Will in keeping with the thought and the word language necessary for human minds to know about The Truth, to begin with, and grow to know The Truth by direct experience.

Therefore, as to the foundation of the Two, Christ and Buddha, there has been no difference. Only in manifestation of the foundation, in keeping with the times, there have been some differences evident.

To know by direct experience, it is not right for anyone to remain attached to whatever They have done. Their manifestations are, though eternal in a way for those particular occasions, not necessarily pervading to all occasions and for all times. But, through such manifestations, grow to know The Source of manifestations that is Their thoughts and The Source of Their thoughts. And only then, one can know the oneness of such Beings.

Likewise, for such High Beings as Krishna and Ram in this holy land, as well as the High Being in the holy land of Iran known as Zarathustra. Also, the High Beings in the holy land of Israel, beginning with Moses and Elisha and also other Prophets, particularly those Prophets who have given to humanity through that holy land the Truth that still lives and will live for all time.

And the last of the great High Beings, who has given to the world one of the biggest world religions – Islam - is Rasul Mohammed. He also has been a Descending High Soul from the spiritual planes, Highest of the High incarnating in the body of the son of man called Mohammed. And He emphasized more the way of life linked with matter that is man, to make them brothers and sisters or sons and daughters of the common Mother that is the Earth, the world, and the common Father that is The Source of all whom He termed Allah.

Unity of World Religions

Therefore, one can see from these diverse manifestations the unity of the six world religions - the Vedic, the Buddhist, the Zarathustri, the Jewish, the Christian and Islam. And, let the humanity that follow these religions or do not follow these religions, judge not such foundations from their subjective points of view, however right they may seem to be.

Instead, grow to know The Source of all these religions. Then you will never fail to find the unity in the diversity of all these six world religions and many that have subsequently followed, including Sikhism and others. They have the same common Source that is God.

God Bless You.
